

## Selected publications of László Lakosi

- L. Lakosi, C. Tam Nguyen, J. Bagi: Photoneutron interrogation of low-enriched uranium induced by bremsstrahlung from a 4 MeV linac. *Nucl. Instr. Meth. B* 266 (2008) 295-300
- C. T. Nguyen, J. Bagi, L. Lakosi: Determining Pu isotopic composition and Pu content of PuBe sources by neutron coincidence technique. *Nucl. Instr. Meth. B* 262 (2007) 75-80.
- L. Lakosi, C. Tam Nguyen: Gamma and fast neutron radiation monitoring inside spent reactor fuel assemblies. *Nucl. Instr. Meth. A* 580 (2007) 788-791.
- L. Lakosi, C. Tam Nguyen, J. Bagi: Non-destructive actinide assay of neutron sources. *Nucl. Instr. Meth. B* 247/2 (2006) 192-198.
- Cong Tam Nguyen, J. Bagi, L. Lakosi: A novel method of quantitative assay of PuBe neutron sources by neutron coincidence technique. *Nucl. Instr. Meth. B* 246 (2006) 409-416.
- L. Lakosi, J. Bagi, Cong Tam Nguyen: Quantitative non-destructive assay of PuBe neutron sources. *Nucl. Instr. Meth. B* 243 (2006) 385-391
- L. Lakosi, N. C. Tam, J. Bagi: Quantitative NDA of isotopic neutron sources. *Appl. Radiat. Isotopes* 63 (2005) 681-687
- J. Bagi, N. C. Tam, L. Lakosi: Assessment of the Pu-content of Pu-Be neutron sources. *Nucl. Instr. Meth. B* 222 (2004) 242-248.
- N. C. Tam, J. Zsigrai, L. Lakosi, E. József and J. Sáfár: Non-destructive analysis of low-enriched and natural U samples by  $\gamma$ -spectrometry. *Nucl. Instr. Meth. A* 515 (2003) 644-650.
- L. Lakosi, N.C. Tam, J. Zsigrai, J. Sáfár: Revealing smuggled nuclear material covered by a legitimate radioisotope shipment using CdTe-based gamma-ray spectrometry. *Appl. Radiat. Isot.* 58 (2003) 263-267.
- L. Lakosi, N. C. Tam: Photoexcitation of  $^{180}\text{Ta}$  by  $^{60}\text{Co}$  and  $^{137}\text{Cs}$  gamma rays. *Nucl. Phys. A* 697 (2002) 44-54.
- N.C. Tam, L. Lakosi, M. Osvay: Monitoring bremsstrahlung from 4 MeV electrons by nuclear excitation and  $\text{Al}_2\text{O}_3$  thermoluminescence dosimeters. *Rad. Prot. Dosimetry* 98 (2002) 401-406.
- N. C. Tam, L. Lakosi: Monitoring fast neutron flux inside spent reactor fuel by CR-39 detector. *Radiat. Measurements* 34 (2001) 601-603.
- Bikit, L. Lakosi, J. Sáfár, Lj. Conkic: Deexcitation of  $^{180\text{m}}\text{Ta}$  by  $^{60}\text{Co}$  gamma rays. *Astrophys. Journ.* 522 (1999) 419-423.
- Bikit, L. Lakosi, J. Sáfár, and Lj. Conkic: Depopulation of  $^{180}\text{Ta}^{\text{m}}$  by bremsstrahlung. *Phys. Rev. C* 59 (1999) 2272-2274
- N. C. Tam, K. Baricza, and L. Lakosi: Monitoring neutrons from spent fuel by bubble detectors. *Radiat. Measurements* 31 (1999) 463-466
- N. C. Tam, L. Lakosi, and M. Osvay: Monitoring the gamma field of a high activity  $^{137}\text{Cs}$  source by nuclear excitation. *Rad. Prot. Dosim.* 85 (1999) 493-496

- N. C. Tam, K. Baricza, and L. Lakosi: Angular and dose dependence of CR-39 neutron response for shape-selected tracks. *Radiat. Measurements* 31 (1999) 419-424
- X. K. Nghiem, L. Lakosi: Isomer activation by bremsstrahlung from a 4 MeV LINAC for elemental analysis. *J. Radioanal. Nucl. Chem.* 230 (1998) 143-147
- N. C. Tam, K. Baricza, L. Lakosi: Application of CR-39 detectors in spent reactor fuel assay. *Radiat. Meas.* 28 (1997) 781-784.
- N.C. Tam, K. Baricza, L. Lakosi: Disturbing effects in spent fuel assay using CR-39 detectors, *Radiat. Meas.* 28 (1997) 785-789.
- L. Lakosi: Production of long-lived isomers by 4 MeV endpoint energy bremsstrahlung. *Z. Phys. A* 356 (1996) 155-161.
- N. C. Tam, K. Baricza, I. Almási and L. Lakosi: Spent fuel assay with thermally stabilized bubble detectors. *Radiat. Prot. Dosim.* 65 (1996) 417-420.
- N. C. Tam, K. Baricza and L. Lakosi: Energy discrimination by shape selection in etched track detection technique, *Radiat. Prot. Dosim.* 66 (1996) 339-342.
- L. Lakosi, N.C. Tam., I. Pavlicsek: Photoexcitation of  $^{189}\text{Os}^m$  and  $^{193}\text{Ir}^m$ . I. Excitation of  $^{189}\text{Os}^m$  by low-energy X-rays. *Phys. Rev. C* 52 (1995) 1510-1515.
- L. Lakosi, N.C. Tam, I. Pavlicsek, Á. Pető: Photoexcitation of  $^{189}\text{Os}^m$  and  $^{193}\text{Ir}^m$ . II. Excitation by  $^{137}\text{Cs}$  and  $^{60}\text{Co}$   $\gamma$ -rays. *Phys. Rev. C* 52 (1995) 1516-1519
- L. Lakosi, N.X. Khanh, N.C. Tam, I. Pavlicsek, Á. Pető: Isomer excitation by high activity  $^{137}\text{Cs}$  and  $^{60}\text{Co}$  sources and low energy X-rays. *Appl. Radiat. Isot.* 46 (1995) 433-434.
- L. Lakosi, N.X. Khanh, N.C. Tam, J. Sáfár, I. Pavlicsek: Photoexcitation of isomers by bremsstrahlung of 4 MeV electrons, *Appl. Radiat. Isot.* 46 (1995) 435-436.
- N.X. Khanh, L. Lakosi, I. Pavlicsek: Excitation of  $^{77}\text{Se}^m$ ,  $^{79}\text{Br}^m$  and  $^{191}\text{Ir}^m$  by  $^{137}\text{Cs}$  gamma-rays. *Phys. Rev. C* 51 (1995) 1676-1681. **2955**
- N.C. Tam, K. Baricza, I. Pavlicsek, L. Lakosi: Investigation of fast neutron emission of spent fuel assemblies with CR-39 track etch detector. *Radiation Measurements* 25 (1995) 485-487.
- T. Sekine, K. Yoshihara, J. Sáfár, L. Lakosi, Á. Veres:  $^{95}\text{Tc}$  and  $^{96}\text{Tc}$  production by  $(\gamma, xn)$  reactions. *J. Radioanal. Nucl. Chem. Lett.* 186 (1994) 165-174.
- J. Sáfár, L. Lakosi: Photoneutron production by bremsstrahlung in the target and the converter. *Appl. Radiat. Isot.* 45 (1994) 1057-1059
