

Publications of Nguyen Cong Tam

Publications in journals

1. N. C. Tam, Á. Veres, I. Pavlicsek, L. Lakosi: Excitation of 8.85 d ^{129m}Xe and 11.9 d ^{131m}Xe by ^{60}Co irradiation. *J. Phys. G.*:16 (1990) 1215-1220.
2. N. C. Tam, Á. Veres, I. Pavlicsek, L. Lakosi: Excitation of ^{83m}Kr by ^{60}Co irradiation, *Appl. Radiat. Isot.* 42 (1991) 431-434.
3. L. Lakosi, Á. Veres, N. C. Tam, I. Pavlicsek: Determination of the production rate of low intensity isomeric transitions, *Nucl. Instr. Meth.* A312 (1992) 17-23.
4. L. Lakosi, I. Pavlicsek, N. C. Tam: Anticoincidence counting of low-intensity isomeric transitions. *Nucl. Instr. Meth.* A339 (1994) 226-231.
5. N. C. Tam, K. Baricza, I. Pavlicsek, L. Lakosi: Investigation of fast neutron emission of spent fuel assemblies with CR-39 track etch detector. *Radiation Measurements* 25 (1995) 485-487.
6. L. Lakosi, N. X. Khanh, N. C. Tam, I. Pavlicsek, Á. Pető: Isomer excitation by high activity ^{137}Cs and ^{60}Co sources and low energy X-rays. *Appl. Radiat. Isot.* 46 (1995) 433-434.
7. L. Lakosi, N. X. Khanh, N. C. Tam, J. Sáfár, I. Pavlicsek: Photoexcitation of isomers by bremsstrahlung of 4 MeV electrons, *Appl. Radiat. Isot.* 46 (1995) 435-436.
8. L. Lakosi, N. C. Tam., I. Pavlicsek: Photoexcitation of $^{189}\text{Os}^m$ and $^{193}\text{Ir}^m$. I. Excitation of $^{189}\text{Os}^m$ by low-energy X-rays. *Phys. Rev. C* 52 (1995) 1510-1515.
9. L. Lakosi, N. C. Tam, I. Pavlicsek, Á. Pető: Photoexcitation of $^{189}\text{Os}^m$ and $^{193}\text{Ir}^m$. II. Excitation by ^{137}Cs and ^{60}Co γ -rays. *Phys. Rev. C* 52 (1995) 1516-1519.
10. N. C. Tam, K. Baricza, I. Almási and L. Lakosi: Spent fuel assay with thermally stabilized bubble detectors. *Radiat. Prot. Dosim.* 65 (1996) 417-420.
11. N. C. Tam, K. Baricza and L. Lakosi: Energy discrimination by shape selection in etched track detection technique, *Radiat. Prot. Dosim.* 66 (1996) 339-342.
12. N. C. Tam, K. Baricza, L. Lakosi: Application of CR-39 detectors in spent reactor fuel assay. *Radiat. Meas.* 28 (1997) 781-784.
13. N.C. Tam, K. Baricza, L. Lakosi: Disturbing effects in spent fuel assay using CR-39 detectors, *Radiat. Meas.* 28 (1997) 785-789.
14. N. C. Tam, L. Lakosi, and M. Osvay: Monitoring the gamma field of a high activity ^{137}Cs source by nuclear excitation. *Rad. Prot. Dosim.* 85 (1999) 493-496.

15. N. C. Tam, K. Baricza, and L. Lakosi: Angular and dose dependence of CR-39 neutron response for shape-selected tracks. *Radiat. Measurements* 31 (1999) 419-424.
16. N. C. Tam, K. Baricza, and L. Lakosi: Monitoring neutrons from spent fuel by bubble detectors. *Radiat. Measurements* 31 (1999) 463-466.
17. N. C. Tam, L. Lakosi: Monitoring fast neutron flux inside spent reactor fuel by CR-39 detector. *Radiat. Measurements* 34 (2001) 601-603.
18. L. Lakosi, N. C. Tam: Photoexcitation of ^{180}Ta by ^{60}Co and ^{137}Cs gamma rays. *Nucl. Phys. A697* (2002) 44-54.
19. N. C. Tam, L. Lakosi, M. Osvay: Monitoring bremsstrahlung from 4 MeV electrons by nuclear excitation and Al_2O_3 thermoluminescence dosimeters. *Rad. Prot. Dosimetry* 98 (2002) 401-406.
20. L. Lakosi, N. C. Tam, J. Zsigrai, J. Sáfár: Revealing smuggled nuclear material covered by a legitimate radioisotope shipment using CdTe-based gamma-ray spectrometry. *Appl. Radiat. Isot.* 58 (2003) 263-267.
21. N. C. Tam, J. Zsigrai, L. Lakosi, E. József and J. Sáfár: Non-destructive analysis of low-enriched and natural U samples by γ -spectrometry. *Nucl. Instr. Meth. A* 515 (2003) 644-650.
22. J. Bagi, N. C. Tam, L. Lakosi: Assessment of the Pu-content of Pu-Be neutron sources. *Nucl. Instr. Meth. B* 222 (2004) 242-248.
23. Cong Tam Nguyen: Age-dating of highly enriched Uranium by gamma-spectrometry, *Nuclear Instruments and Methods in Physics Research B* 229 (2005) 103-110
24. L. Lakosi, N. C. Tam, J. Bagi: Quantitative NDA of isotopic neutron sources. 8th Int. Conf. on Applications of Nuclear Techniques. Crete, Greece, 12-18 Sep., 2004; *Applied Radiation and Isotopes* 63 (2005) 681-687
25. Cong Tam Nguyen: Verification of the Pu-239 content, isotopic composition, and age of plutonium in PuBe neutron sources by gamma-spectrometry, *Nucl. Instr. Meth. B* 251 (2006) 227-236
26. Cong Tam Nguyen, Jozsef Zsigrai: Gamma-spectrometric uranium age-dating using intrinsic efficiency calibration. *Nucl. Instr. Meth. B* 243 (2006) 187-192
27. Cong Tam Nguyen, Jozsef Zsigrai: Basic characterization of highly enriched uranium by gamma-spectrometry. *Nucl. Instr. Meth. B* 246 (2006) 417-424
28. L. Lakosi, J. Bagi, C. T. Nguyen: Quantitative non-destructive assay of PuBe neutron sources. *Nucl. Instr. Meth. B* 243 (2006) 385-391
29. L. Lakosi, C. T. Nguyen, J. Bagi: Non-destructive actinide assay of neutron sources. *Nucl. Instr. Meth. B* 247/2 (2006) 192-198.

30. C. T. Nguyen, J. Bagi, L. Lakosi: A novel method of quantitative assay of PuBe neutron sources by neutron coincidence technique. Nucl. Instr. Meth. B 246 (2006) 409-416.
31. L. Lakosi, C. T. Nguyen: Gamma and fast neutron radiation monitoring inside spent reactor fuel assemblies. Nucl. Instr. Meth. A 580 (2007) 788-791.
32. Cong Tam Nguyen: Determining the “doubles” count rate for AmLi sources. Nucl. Instr. Meth. A 580 (2007) 289-292.
33. C. T. Nguyen, J. Bagi, L. Lakosi: Determining Pu isotopic composition and Pu content of PuBe sources by neutron coincidence technique. Nucl. Instr. Meth. B 262 (2007) 75-80.
34. A. N. Belizov, R. Gunnink, J. Zsigrai, C. T. Nguyen, V. V. Tryshyn: Performance testing of the upgraded uranium isotopics multi-group analysis code MGAU. Nucl. Instr. Meth. A 575 (2007) 498-506.
35. L. Lakosi, C. T. Nguyen, J. Bagi: Photoneutron interrogation of low-enriched uranium induced by bremsstrahlung from a 4 MeV linac. Nucl. Instr. Meth. B 266 (2008) 295-300.

Proceeding publications

36. J. Sáfár, I. Almási, N. C. Tam, L. Lakosi: A CdTe-based portable attribute tester for VVER spent fuel. Proc. 19th ESARDA Symp. on Safeguards and Nuclear Material Management, Montpellier, France, 13-15 May, 1997, ESARDA 28, Joint Research Centre, eds C. Foggi, F. Genoni, pp. 411-413.
37. L. Lakosi, N. C. Tam, J. Zsigrai, J. Sáfár: A NDA method for revealing unreported irradiation using a CdTe-based PSFAT. Proc. 21st Symp. Safeguards and Nuclear Material Management, 4-6 May, Sevilla, ESARDA 29, (eds C. Foggi, E. Petraglia), 1999, pp.369-374.
38. L. Lakosi, N. C. Tam, J. Zsigrai, J. Sáfár: Revealing smuggled nuclear material covered by a legal radioisotope shipment using CdTe-based gamma-ray spectrometry. Proc. 7th Int. Conf. on Applications of Nuclear Techniques. “Nuclear and Atomic Industrial & Analytical Applications”. Crete, Greece, June 17-23, 2001: CD-ROM
39. J. Sáfár, J. Zsigrai, N. C. Tam, L. Lakosi: Detection of smuggling of nuclear material covered by a legal transport of radioactive material. Proc. Int. Conf. „Measures to prevent, intercept and respond to illicit uses of nuclear material and radioactive sources”, Stockholm, Sweden, 7-11 May 2001. IAEA, Vienna, 2002, 398-401.
40. N. C. Tam, J. Zsigrai, L. Lakosi, J. Sáfár: Quantitative non-destructive assay and identifying the matrix of unknown nuclear material. Proc. Int. Conf. “Measures to

prevent, intercept and respond to illicit uses of nuclear material and radioactive sources”, Stockholm, Sweden, 7-11 May 2001. IAEA, Vienna, 2002, 569-570.

41. L. Lakosi, N. C. Tam, J. Zsigrai, T. Bíró, J. Sáfár: Recent developments and experience with a CdZnTe-based PSFAT. Proc. 23rd ESARDA Annual Symp. Safeguards and Nuclear Material Management, Bruges, Belgium, 8-10 May, 2001 (ed. C. Foggi), 2003, pp. 688-692.
42. J. Bagi, N. C. Tam, L. Lakosi: Determination of the Pu-content of Pu-Be neutron sources – a feasibility study. Proc. Int. Conf. on Advances in Destructive and Non-Destructive Analysis for Environmental Monitoring and Nuclear Forensics, Karlsruhe, Germany, 21-23 Oct. 2002, IAEA-CN-98/508p, IAEA, Feb. 2003, CD-ROM.
43. Lakosi L., N. C. Tam, Zsigrai J., Sáfár J.: Ismeretlen eredetű nukleáris anyagok gamma-spektrometriai analízise. Nukleáris Technika Szimp. 2002. okt. 3-4, Budapest, CD-ROM, 2003.
44. Bagi J., N. C. Tam, Lakosi L.: Roncsolásmentes módszer kidolgozása Pu-Be neutronforrások Pu-tartalmának meghatározására. Nukl. Techn. Szimp. 2002. okt. 3-4., Budapest, CD-ROM, 2003.
45. N. C. Tam, J. Bagi, L. Lakosi: Quantitative NDA of Pu-Be neutron sources. Proc. 25th Annual ESARDA Symp. Safeguards and Nucl. Material Management, Stockholm, 13-15 May, 2003. CD-ROM.
46. J. Zsigrai, N. C. Tam, L. Lakosi, J. Bagi: Techniques developed at the Institute of Isotopes. 26th ESARDA Meeting, Luxembourg, 1-4 June 2004.
47. L. Lakosi, N. C. Tam, J. Bagi: Quantitative NDA of isotopic neutron sources. 8th Int. Conf. on Applications of Nuclear Techniques. Crete, Greece, 12-18 Sep., 2004; Applied Radiation and Isotopes 63 (2005) 681-687
48. Cong Tam Nguyen, Jozsef Zsigrai: Gamma-spectrometric methods for age-dating of highly enriched Uranium, Proceedings of ESARDA 2005 Annual Meeting; Symposium in London; 10-12 May, CD-ROM
49. Cong Tam Nguyen, Jozsef Zsigrai: Characterization of highly enriched uranium by gamma spectrometry, Proceedings of ESARDA 2005 Annual Meeting; Symposium in London; 10-12 May, CD-ROM
50. Jozsef Zsigrai, Cong Tam Nguyen, Laszlo Lakosi: Determining the nuclear-material content of a mixture of damaged spent fuel within sealed containers at the Paks NPP, Proceedings of ESARDA 2005 Annual Meeting; Symposium in London; 10-12 May, CD-ROM
51. Janos Bagi, Cong Tam Nguyen, Laszlo Lakosi, Bent Pedersen, Hamid Tagziria, Peter Schillebeeckx: Characterisation of PuBe sources by Non Destructive Assay, Proceedings of ESARDA 2005 Annual Meeting; Symposium in London; 10-12 May, CD-ROM

52. Cong Tam Nguyen, Janos Bagi, and Laszlo Lakosi: Identification and quantitative assay of radioisotopic neutron sources by neutron and gamma measurements, Proceedings of ESARDA 2005 Annual Meeting; Symposium in London; 10-12 May, CD-ROM
53. L. Lakosi, Cong Tam Nguyen, J. Bagi: Photoneutron interrogation of uranium samples by a 4 MeV LINAC – a feasibility study. Proc. Int. Symp. on Utilization of Accelerators, Dubrovnik, 5-9 June, 2005.
54. J. Zsigrai, C. T. Nguyen: Determination of the age of uranium bearing items of arbitrary shape. Symposium on International Safeguards; Addressing Verification Challenges. IAEA, Vienna, 16 – 20 Oct. 2006, IAEA-CN-148/161P, pp.223-227.
55. C. T. Nguyen: Gamma-spectrometry for characterization of PuBe neutron sources. Symposium on International Safeguards; Addressing Verification Challenges. IAEA, Vienna, 16 – 20 Oct. 2006, IAEA-CN-148/163P, pp. 237-245.
56. L. Lakosi, C. T. Nguyen, J. Bagi: Non-destructive actinide assay of neutron sources. Nucl. Instr. Meth. B 247/2 (2006) 192-198.
57. Cong Tam Nguyen, J. Bagi, L. Lakosi: A novel method of quantitative assay of PuBe neutron sources by neutron coincidence technique. Nucl. Instr. Meth. B 246 (2006) 409-416.
58. L. Lakosi, J. Bagi, C. T. Nguyen: Advances in NDA of Pu in PuBe neutron sources. Addressing Verification Challenges, Proc. Symposium on International Safeguards, Vienna, 16-20 Oct. 2006, IAEA-CN-148/160P, IAEA, Vienna, 2007 pp. 215-221.
59. C. T. Nguyen, J. Zsigrai: Determining ^{234}U isotopic ratio in highly enriched uranium. Proc. ITU/IPSC Workshop 2005 on MGA, FRAM, IGA, GXW, Karlsruhe, Nov. 14-16, 2005, EC 2007.
60. J. Zsigrai, C. T. Nguyen, L. Lakosi: Performance testing of the device for safeguards verification of the damaged fuel at Paks NPP. 29th ESARDA Annual Meeting, Symp. on Safeguards and Nucl. Mat. Manage., Aix en Provence, May 22-24, 2007. CD-ROM.
61. J. Bagi, L. Lakosi, C. T. Nguyen: Verification and disposal of PuBe neutron sources in Hungary. 29th ESARDA Annual Meeting, Symp. on Safeguards and Nucl. Mat. Manage., Aix en Provence, May 22-24, 2007, CD-ROM.
62. L. Lakosi, C. T. Nguyen: Photoneutron interrogation of highly enriched uranium samples by a 4 MeV linac. Proc. Eight International Topical Meeting on Nuclear Applications and Utilization of Accelerators ACCAPP'07, Pocatello, Idaho, USA, July 29-August 2, 2007, pp. 447-453.
