

RADIATION CHEMISTRY OF HYDRO- CARBONS

Gy. Cserép

I. György

M. Roder

and L. Wojnárovits

Edited by G. Földiák

Akadémiai Kiadó, Budapest

LIST OF CONTRIBUTORS TO THIS VOLUME

GY. CSERÉP

Institute of Isotopes of the Hungarian Academy of Sciences
Budapest, Hungary

I. GYÖRGY

Institute of Isotopes of the Hungarian Academy of Sciences
Budapest, Hungary

M. RODER

Central Research Institute for Physics of the Hungarian Academy of Sciences
Budapest, Hungary

L. WOJNÁROVITS

Institute of Isotopes of the Hungarian Academy of Sciences
Budapest, Hungary

CONTENTS

Preface (by R. H. Schuler)	11
Introduction	15
1. Basic processes in hydrocarbon radiolysis, and methods for investigating them (by I. GYÖRGY and L. WOJNÁROVITS)	17
1.1. Absorption of radiation energy	17
1.2. The chemical steps of radiolysis	23
1.2.1. Reactions of primary species	23
1.2.2. Secondary reactions of free radicals	26
1.2.3. Secondary reactions of ions	29
1.3. Effect of experimental conditions on the yields of end-products ..	30
1.3.1. Dose effects	30
1.3.2. Dose rate and LET effects	32
1.3.3. Temperature and phase effects	34
1.4. A short summary of experimental methods	36
1.4.1. Chemical methods	36
1.4.2. Physical methods	44
1.5. Auxiliary techniques	46
1.5.1. Mass spectrometry	47
1.5.2. Photolysis and electron impact	50
1.5.3. Other methods	53
References	53
2. Aliphatic alkanes (by I. GYÖRGY)	61
2.1. Introductory remarks	61
2.2. Individual compounds	68
2.2.1. Methane	69
2.2.2. Ethane	75
2.2.3. Propane	80
2.2.4. n-Butane	87
2.2.5. Isobutane	94

2.2.6. n-Pentane	100
2.2.7. Branched-chain pentane isomers	107
2.2.8. n-Hexane	117
2.2.9. Branched-chain hexane isomers	126
2.2.10. C ₇ -C ₁₂ n-alkanes	134
2.2.11. Branched-chain C ₇ -C ₁₂ alkane isomers	138
2.2.12. n-Hexadecane and n-heptadecane	147
2.3. Mixtures of aliphatic alkanes	151
2.4. Conclusions	157
References	165
3. Cycloalkanes (by L. WOJNÁROVITS)	177
3.1. Introductory remarks	177
3.2. Individual compounds	183
3.2.1. Cyclopropane and cyclobutane	183
3.2.2. Cyclopentane	192
3.2.3. Cyclohexane	201
3.2.4. C ₇ -C ₁₀ cycloalkanes	214
3.2.5. Alkylcycloalkanes	215
3.2.6. Bridged ring cycloalkanes	228
3.3. Mixtures of cycloalkanes	233
3.4. Conclusions	236
References	246
4. Aliphatic alkenes and alkynes (by GY. CSERÉP)	253
4.1. Introductory remarks	253
4.2. Individual compounds	260
4.2.1. Ethylene	260
4.2.2. Propene	272
4.2.3. Butene isomers	280
4.2.4. Pentene isomers	294
4.2.5. C ₆ aliphatic alkenes and alkadiene	299
4.2.6. C ₇ -C ₁₆ aliphatic alkenes	307
4.2.7. Acetylenes	314
4.3. Mixtures of aliphatic alkenes	320
4.4. Conclusions	330
References	343

5. Cycloalkenes (by GY. CSERÉP)	351
5.1. Introductory remarks	351
5.2. Individual compounds	352
5.2.1. Cyclobutene and cyclopentene	352
5.2.2. Cyclohexene	357
5.2.3. C ₇ -C ₁₂ cycloalkenes	368
5.2.4. Substituted C ₆ cyclic alkenes	368
5.2.5. Cyclohexadiene isomers	372
5.2.6. C ₇ -C ₁₂ cyclic polyenes	376
5.3. Mixtures of cycloalkenes	379
5.4. Conclusions	387
References	390
6. Aromatic hydrocarbons (by M. RODER)	393
6.1. Introductory remarks	393
6.2. Individual compounds	397
6.2.1. Benzene	397
6.2.2. Alkyl- and alkenylbenzene homologues	416
6.2.3. Biphenyl	434
6.2.4. Alkylbiphenyls and diphenylalkanes	438
6.2.5. Terphenyl isomers and partially hydrogenated terphenyls	439
6.2.6. Hydrocarbons with condensed rings	441
6.3. Mixtures of aromatic hydrocarbons	445
6.4. Conclusions	454
References	462
7. Past results and future developments	469
Subject index	473
